Truvik

SHOWER ROOM SERIES

ADVANCED TECHNOLOGY

Dewo shower room

COATING TECHNOLOGY

The glass technology of shower room adopts advanced vacuum magnetron sputtering technology, plating layers of metal on the high quality surface of the glass, which is wear-resisting and not easy to be scratched, to present beautiful patterns and build up good mirror effect.

FILM TECHNOLOGY

The industry's leading anti-explosion diamond coating technology is composed of three layers of high quality base materials, such as diamond layer, anti-explosion layer and high permeable layer.

V RAIL TECHNOLOGY

The unique V-shaped guide rail groove design breaks the tradition, and effectively reduces the shaking and noise of the shower room to ensure more stable and smooth running, with higher matching precision and long service life.

HARDWARE PLATING TECHNOLOGY

The exquisite vacuum PVD ion plating process is adopted, and the surface of the hardware is bright after high gloss electroplating, which will never fade, and the service life is long with the best texture.

HARDWARE POLISHING TECHNIQUE

The exclusive mirror polishing process in the industry shows the exquisite quality and the surface roughness is almost zero after pure handmade coarse, medium and fine polishing. The 10K mirror effect can present the perfect texture.

PULLEY TECHNIQUE

The unique inverse U-shaped wheel structure design in the industry ensures no shaking of the product, and can have more smooth running, which is mute and noise reducing, and the bearing force is uniform and the safety performance is good.

STAINLESS STEEL
UPPER RAIL

#304 stainless steel plate, V plate molding processing line profilers
The upper guide wheel runs groove to protect the friction sound produced by the wheel when it is moving

STAINLESS STEEL
HANDLE

Selection of imported SUS304 stainless steel, Seiko casting, pure hand polished and polished to experience the noble quality, high-grade durable.

BOTTOM NO
PONDING DESIGN

When the shower door is set to open, the surface of the door will be residual water and flow down, the tank can focus the water, and then diverted back to the shower room.
Simple design, easy to clean, no water.

DO-9901

- Be-custom made
- Product Size:1200~1900x1900~2100mm

- 304 Stainless steel color:
- Black light
